4K Media Player, MYPIN HDMI Media Player Read USB drive/SD card with HD HDMI/AV/...

£42.99 3.9★

Display Winner: Product B The Formuler Z11 Pro MAX BT1 Edition is the stronger choice for display output because it is built as a modern 4K TV box with HDMI output and a focus on smooth streaming and IPTV playback. Product A, the MYPIN HDMI Media Player, does support HD HDMI/AV/VGA output and can play common formats such as RMVB, MKV, and JPEG, but its display capability is much more basic and aimed at file playback rather than optimised TV integration. If your priority is getting the best-looking interface and a more polished viewing experience on a modern TV, the Formuler wins.

Performance Winner: Product B Formuler's Z11 Pro MAX is the clear performance leader. It runs Android 11 and Mytvonline 3, which means it is designed for apps, IPTV services, and a more responsive smart-box experience. Product A is essentially a simple media player: it reads from USB drive or SD card and plays files, but it is not in the same class for multitasking, app support, or long-term responsiveness. The MYPIN is fine for straightforward playback, but the Formuler is far better if you want a box that feels faster, more capable, and more future-proof.

Build quality and design Winner: Product B The Formuler box feels like a premium product, and the BT1 Edition adds a Bluetooth remote, which is a meaningful upgrade for everyday use. The combination of a well-known IPTV-focused brand, a current Android platform, and a modern remote makes it more convincing as a main living-room device. The MYPIN unit is cheaper and functional, but its design is more utilitarian and its feature set suggests a basic media accessory rather than a polished entertainment hub. If aesthetics, remote convenience, and overall device polish matter, Formuler is ahead.

Battery life Winner: Tie Neither product is battery-powered in the usual sense, so battery life is not really a meaningful comparison. Both are mains-powered set-top style devices, and the real practical difference is remote control convenience rather than internal battery endurance. The Formuler's Bluetooth remote is likely more convenient than a basic infrared remote, but that is about usability, not battery life. On this dimension, there is no real winner.

Price and value for money Winner: Product A This is where the MYPIN wins decisively. At £42.99, it is £113.95 cheaper than the Formuler Z11 Pro MAX BT1 Edition at £156.94. If all you need is a simple device to play local video files, photos, or music from USB or SD card, the MYPIN offers strong value because you are not paying for Android, IPTV software, or premium remote hardware you may never use. The Formuler is expensive, but its higher price is justified only if you will actually use its IPTV and app ecosystem.

Game library/features Winner: Product B The Formuler wins by a huge margin on features. Android 11 opens the door to streaming apps, IPTV services, and a much broader entertainment ecosystem, while Mytvonline 3 is specifically designed to improve live TV and IPTV use. Product A is not a gaming or app platform; it is a file player with support for common media formats. If by features you mean flexibility, app support, and the ability to do far more than play files, the Formuler is the obvious winner.

Overall user experience Winner: Product B For most people looking for a main TV box, the Formuler Z11 Pro MAX BT1 Edition delivers the better overall experience. It is more powerful, more versatile, better supported by its software stack, and easier to live with thanks to the Bluetooth remote. The MYPIN is simpler, but that simplicity is also its limitation: it is best treated as a basic media player rather than a complete entertainment solution. If you want the box that feels more premium and does more, the Formuler is the superior product.

Overall summary: Product A is the budget pick and makes sense for basic offline media playback. Product B is the better all-rounder and the right choice for anyone who wants a serious IPTV and streaming box with modern software, better performance, and a more refined experience. The final verdict is clear: buy the Formuler Z11 Pro MAX BT1 Edition unless your only goal is cheap USB/SD playback.

Winner: b

The Formuler Z11 Pro MAX BT1 Edition is the better buy for most shoppers because it offers a far more capable platform: Android 11, Mytvonline 3, 4K support, and a Bluetooth remote. It is built for real-world TV use, not just file playback. The MYPIN is much cheaper, but it is a basic media player with a much narrower purpose. If you want one box to handle streaming, IPTV, and a smoother living-room experience, Formuler is the definitive choice.

Buy Product A If...

Buy Product A if you only need a cheap, straightforward media player for USB sticks or SD cards. It is a sensible choice for playing MKV, JPEG, RMVB, and similar local files on a TV without paying for smart-box features you won’t use. It also makes sense as a secondary bedroom or workshop player where simplicity matters more than apps.

Buy Product B If...

Buy Product B if you want a proper premium TV box for IPTV, streaming apps, and a more polished everyday experience. It is the right choice if you value speed, better software, and the convenience of the BT1 Bluetooth remote. For a main lounge setup, or if you expect to use the box regularly, the extra cost is easier to justify.
